

YOUR DOG!

BARKING? ANXIOUS? DESTRUCTIVE BEHAVIOR?

EXERCISE + GAMES

Dogs are very smart and have lots of energy. Being left alone a lot, without anything to do, makes them bored and anxious which can result in barking, pacing, destruction, or aggression.

SOLUTION: Walk/Play with them daily, offer dog toys, play ball with them, run around your yard with them.

SENSE OF SMELL

The most powerful sense for a dog! Leash walks around your neighborhood, letting your dog sniff around, provides them both exercise and the scent stimulation they so crave!

BONUS: Exercise & fresh air for you, too!

SOCIAL + LOVE

Most dogs are social. Leaving them isolated and alone without canine or human socializing can make them anxious, depressed, or insane.

SOLUTION: Your dog should get ample attention socializing with you, your family, and/or furry family members.

HEARTWORM

Heartworms come from a mosquito bite. This will cause your dog sickness, pain, and death.

SOLUTION: A monthly preventative protects them. Please provide a monthly Flea & Tick preventative, too!
